Stability

The company was founded in 1996 as Wingshing Industrial Ltd.

The new Demass brand for the professional market was launched in 2006.

## Profile

---

The Company was founded in 1996 and specialized in manufacturing measuring tape. With 20 years' efforts, it has expanded its operation to be a leading manufacturer of premium quality measuring tapes.

We are proud of our reputation for excellence, innovation and dedicated to testing, designing and improving our products to ensure quality on materials, shapes, functions and accuracy. Becoming the world's best at what we do is our lifelong goal.

The company continuously offers private label service for global hand tool industry, while also providing OEM service for major measuring tape manufacturers.

## EC

Demass measuring tapes have passed EC Type Approval which covers all member countries of the European Union. Our EC Type -Examination Certificate covers the following Demass measuring tapes:

Pocket tape	1m-10m	Class I or Class II
Long steel tape	10m-50m	Class II
Fiberglass tape	10m-50m	Class II or Class III

## Accuracy tolerance

- I**  $\pm [(0.1 + 0.1L) \text{ mm} + 0.1 \text{ mm}]$  (With hook)
- II**  $\pm [(0.3 + 0.2L) \text{ mm} + 0.2 \text{ mm}]$  (With hook)

# Blade finish

## 1. Lacquered blade

By a special process, the high-quality environmental friendly water dissolved resin coating materials are evenly coated on the surface of the blade to protect the printed marks. There are bright and matte colors for choice.

## 2. Nylon coated blade

Combined with a high performance nylon and special coating process, the nylon coating covers the entire blade surface ensuring its abrasion resistance, anti-corrosion and prolonging its durability.

## 3. SUPERBLADE

Applied with a special extruding process, the high performance nylon thoroughly covers the whole blade to provide it with super abrasion resistance and the anti-corrosion functions like rust-proof, anti-acid, anti-alkali as well as to prolong its life.

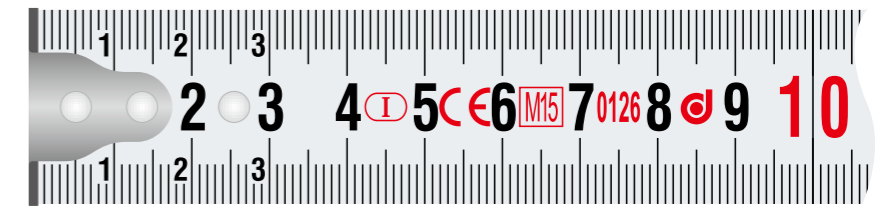

### Technical specifications comparison

Specifications	The thickness of the coating layer (mm)	The abrasion resistance test with rubber (times)	The abrasion resistance test with falling sand (litres)
